

T.O.P.

Trauma Outcome Process*

The program works with youth who have caused sexual harm and their caregivers as they navigate through the T.O.P Workbook.

The workbook provides a bridge between treatment and competency development. Beyond simply answering all of the questions, successful completion necessitates behavior change. The workbook is effective when violence ends.

Treatment is founded on the principle that helping young people make sense of past decisions to cause harm can prevent it from happening again.

Cornerstone Program

3 Tiered Intervention Program

Gr. 6-12

The three-tiered program provides a leveled system of substance use education that supports the student in identifying the source of their substance use and provides information on the effects of those substances in their bodies. These programs consider the community circumstances and address real life situations that these individuals may experience daily.

Tier 1- Tier 1 is for youth that have experimented with substances for the first time.

Tier 2- Tier 2 is a youth program for repeat offenders and repeat users of addictive substances, substance abuse charges, or other substance abuse related issues.

Tier 3- Tier 3 is a youth program for repeat offenders that are facing possible jail/detention for drug infractions and repeat users of substance abuse, substance abuse charges, or other substance abuse related issues. *(JPO/Court referrals ONLY)*

We work closely with the legal system to provide children with intensive drug psychoeducation.

Drug Intervention

In-School Suspension Series

Gr. 6-12

The program targets and prepares students while in, in-school suspension with life skills for academic, life success, and social skills. Interactive lessons provide guidance relationships, building healthy and positive friendships, and refusing negative peer influence. Students learn the challenges of social and academic pressures, making responsible decisions, how to manage stress and anger, reflecting on personal relationships, and resolving conflicts.

Drug Education for Caregivers living with students who use/abuse drugs

This program aims to help Caregivers have a better grasp on what is happening in the lives of students that abuse drugs.

The program will teach about drug trends, drug talk and lingo, drug clothing, drug texting, drug stash areas in home and on person.

The program will offer guidance and support for Caregivers that are looking for a better understanding of the drug abuse world.

School Drug Prevention

Too Good for Drugs

Gr. 5

Students launch into the activities by naming and illustrating a personal, short-term goal, and the lessons that follow enable students to reach their goals through responsible decision making, identifying and managing emotions, and effective communication.

Drug Education Program

Gr. 6-12 (on request)

Lessons help students build a social emotional capacity for drug-free living through a journey of setting and obtaining reachable goals, making responsible decisions, managing and understating emotions, and skills in refusing negative peer pressure and building healthy relationships. Students will identify what healthy alternatives there are to using drugs and resolving problems through healthy, pro-social approach.
